

## Volume contents

### Volume 22 No. 1 1995/1996

#### Review

- Signals controlling the expression of PDGF** 1-24  
R.P.H. Dirks, H.P.J. Bloemers

#### Research articles

- Asymmetric structure of five and six membered DNA hairpin loops** 25-31  
U. Baumann, S. Chang
- Nucleotide sequence of a major satellite DNA element isolated from a saltwater fish *Sillago japonica*** 33-35  
M. Kato, M. Yoshida
- The effect of matrix attached regions (MAR) and specialized chromatin structure (SCS) on the expression of gene constructs in cultured cells and in transgenic mice** 37-46  
J. Attal, M. Cajero-Juarez, D. Petitclerc, M.-C. Théron, M.-G. Stinnakre, M. Bearzotti, G. Kann, L.-M. Houdebine
- Interaction of Co, Mn, Mg and Al with d(GCGTACGC): a spectroscopic study** 47-52  
M.T. Rajan, D. Champion C.S. Kumar, D. Vishnuvardhan, K.S. Jagannatha Rao, M.A. Viswamitra
- Enrichment of chromosome specific hncDNAs by magnetic bead coupled Alu sequences** 53-57  
K. Overmyer, H.-W. Müller, W. Gimbel, E. Göttert, E. Meese
- Androgen treatment protects mouse liver chromatin from cleavage by endogenous nucleases during aging *Androgen and nuclease activity*** 59-61  
S. Mukherjee, A. Asaithambi, M.K. Thakur
- Autoimmune diseases: nuclear autoantigens can be found at the cell-surface** 63-66  
P. Jordan, D. Kübler

### Volume 22 Nos. 2-3 1995/1996

#### Special issue: RNase MRP/RNase P systems

- Introduction** 67  
R. Karwan, H. Pluk, W.J. van Venrooij

#### RNase MRP

- RNase MRP and rRNA processing** 69-73  
L. Lindahl, J.M. Zengel
- Genetic and biochemical analyses of yeast RNase MRP** 75-79  
D. Tollervey

<b>Structural and functional similarities between MRP and RNase P</b> R. Reddy, S. Shimba	81-85
<b>The yeast, <i>Saccharomyces cerevisiae</i>, RNase P/MRP ribonucleoprotein endoribonuclease family</b> T.H. Reilly, M.E. Schmitt	87-93
<i>RNase P</i>	
<b>Early studies of native ribonuclease P, including discovery of its essential RNA component</b> B.C. Stark	95-97
<b>RNase P from bacteria. Substrate recognition and function of the protein subunit</b> L.A. Kirsebom, A. Vioque	99-109
<b>Genetic analysis of the structure and function of RNase P from <i>E. coli</i></b> H. Shiraishi, Y. Shimura	111-114
<b>Analysis of the tertiary structure of bacterial RNase P RNA</b> M.E. Harris, N.R. Pace	115-123
<b>RNase P RNA of <i>Mycoplasma capricolum</i></b> C. Ushida, D. Izawa, A. Muto	125-129
<b>Ribonuclease P structure and function in <i>Archaea</i></b> J.W. Brown, E.S. Haas	131-134
<b>The RNase P of <i>Dictyostellum discoideum</i></b> D. Drainas	135-138
<b>Ribonuclease P from plant nuclei and photosynthetic organelles</b> A. Schön	139-145
<b>Structure, mechanism and evolution of chloroplast transfer RNA processing systems</b> P. Gegenheimer	147-150
<b>Plant mitochondrial RNase P</b> A. Marchfelder	151-156
<b>Structure-function analysis in nuclear RNase P RNA</b> D.R. Engelke, E. Pagán-Ramos, A.J. Tranguich	157-160
<b>Recent approaches to probe functional groups in Ribonuclease P RNA by modification interference</b> W.-D. Hardt, J.M. Warnecke, R.K. Hartmann	161-169
<b>RNase P as hyperprocessing enzyme: A model for formation of a biologically functional tRNA fragment</b> Y. Kikuchi	171-175
<b>Enzymatic RNA synthesis and RNase P. Evolutionary aspects</b> G. Krupp	177-180
<b>Transfer RNA gene organization and RNase P</b> C.J. Green	181-185

	203
<b>tRNA processing in human mitochondrial disorders</b>	<b>187-193</b>
J.P. Masucci, E.A. Schon	
<b>RNases in ColE1 DNA metabolism</b>	<b>195-200</b>
Y.H. Jung, Y. Lee	
<b>Volume contents</b>	<b>201-203</b>
